JOEL EBENKA

DevOps Engineer | AWS • Azure • GCP • CI/CD • IaC • Kubernetes

joelebenka45@yahoo.com • Phone on request • Yaoundé, Cameroon • Available Full Remote / Relocation
linkedin.com/in/joel-ebenka-b810651b5 • Bilingual: English (Fluent) | French (Fluent)

PROFESSIONAL PROFILE

Bilingual (EN/FR) DevOps Engineer with 5+ years of experience designing, automating, and operating CI/CD pipelines and multi-environment cloud infrastructure (AWS, Azure, GCP). Skilled in Infrastructure as Code (Terraform, Ansible), containerization (Docker, Kubernetes), and application monitoring (Grafana, Prometheus, New Relic). Proven track record of reducing incident response times by 40–60% and improving system uptime by 30% in regulated, high-availability environments (finance, transportation, healthcare). Experienced working across international, distributed teams with a strong DevOps culture and a passion for automation.

TECHNICAL SKILLS

CI/CD & Pipelines	Jenkins • Maven • Git • SonarQube • SonarCloud • Artifactory
Containerization	Docker • Docker Compose • Kubernetes (K8s) • AWS ECR • GKE • Cloud Run
IaC & Automation	Terraform • Ansible • LAMP Provisioning • Multi-server Patch Management
Cloud Platforms	AWS (EC2, S3, Lambda, API Gateway, RDS, VPC, ELB, EFS, CloudWatch, IAM) • Azure (AD B2C, Blob Storage, Service Bus, Dynamics 365) • GCP (GKE, App Engine, Cloud Run)
Monitoring & Alerting	Grafana • Prometheus • New Relic • PaperTrail • CloudWatch • OpsGenie • Azure Service Bus DLQ
Security & Access	Azure AD B2C • AWS IAM • Least-privilege • Identity Management • Encryption
Languages & Scripting	Python • Java • Bash • SQL • T-SQL

CERTIFICATIONS

Google Cloud Associate Cloud Engineer Google Cloud | 2024
AWS re/Start Graduate Amazon Web Services | 2022
Jenkins Pipeline: Declarative Approaches & IaC Udemy / Jenkins | 2022
Introduction to Cybersecurity Cisco Networking Academy | 2021

PROFESSIONAL EXPERIENCE

Cloud Support & DevOps Engineer — Mar 2025 – Mar 2026

MBOA DIGITAL – Propellerhead (PHL) • Yaoundé, Cameroon | Remote client: New Zealand

- Set up and maintained production application monitoring via New Relic, PaperTrail, and OpsGenie reduced P1/P2 incident response time by 60%
- Managed deployment environments (Pre-prod, Test, Production): file and software distribution via Azure Blob Storage, Artifactory, and WinSCP with full impact awareness
- Monitored and remediated Azure Service Bus Dead Letter Queues (DLQ) to ensure continuity of card and concession processing flows
- Administered user identity lifecycles (Azure AD B2C, MS Dynamics 365 CRM, SQL IDM databases) resolved sync failures via SQL patches and attribute fixes, reducing escalations by 40%
- Published and managed GTFS/FareCalc data feeds to public Journey Planners and Command Centers for a regulated transportation infrastructure
- Improved system uptime by 30% through proactive cloud infrastructure management and automated alerting

DevOps Engineer
May 2022 – Mar 2024

DR FINANCIAL SERVICES • Houston, Texas, USA | Full Remote

- Designed and operated end-to-end CI/CD pipelines on Jenkins (AWS EC2): Maven, SonarQube, Python, Java, Git integration fully automated build, test, and deployment
- Deployed a serverless architecture on AWS: API Gateway + Lambda + DynamoDB with static S3 hosting for a regulated financial services platform
- Monitored EC2 environment performance via Grafana and Prometheus; investigated and resolved incidents with systematic root-cause documentation
- Containerized a Python Flask application on EC2 via Docker Compose, ensuring deployment consistency from source to production
- Automated multi-server patch and update management via Ansible playbooks, standardizing configurations and reducing manual intervention

DevOps & Cloud Support Engineer
Apr 2020 – Feb 2022

DATA SERVICE GROUP • Delaware, USA | Full Remote

- Architected complete AWS infrastructure for client web applications: VPC, EC2, ELB, RDS, S3, CloudWatch, IAM, EFS fully provisioned via Terraform IaC (30% infrastructure incidents)
- Created Ansible playbooks to automate LAMP stack provisioning, significantly reducing environment setup times
- Integrated Maven and SonarCloud into Jenkins pipelines for code quality analysis on a health geolocation platform a highly regulated environment
- Generated Docker images via Jenkins pipelines and deployed to AWS ECR for container registry management
- Secured static site hosting via S3, CloudFront, and Route 53 for global availability and resilient DNS routing

EDUCATION

Master's Network & Information Security Oct 2020 – Nov 2022
EST LaSalle • Cameroon

Cloud Architect Apprenticeship Google Cloud Track Jul 2024 – Dec 2024
JFN Institute of Technology • Douala, Cameroon

AWS re/Start Cloud Practitioner May 2022 – Sep 2022
Orange Digital Center • Cameroon

KEY ACHIEVEMENTS

- ↓ 60% reduction in incident response time on the MOSST application via advanced monitoring, structured alerting, and P1/P2 production management
- ↓ 40% reduction in escalations through rigorous root-cause analysis and proactive identity and access management
- ↑ 30% improvement in system uptime through IaC adoption (Terraform, Ansible) and provisioning automation
- ↓ 30% reduction in infrastructure incidents via full IaC coverage and automated configuration management
- Created an internal DevOps training program for junior engineers improved team skills and standardized CI/CD practices
